## Choose the right variant

Check the exact drive model, supply voltage, rated output current and overload duty in its specification. The kW/A pair is a catalogue filter; it does not describe every variant in a listed drive family.

This page lists families associated with the selected catalogue filter. Use the individual model’s datasheet, drawing and manual to confirm its suitability.

## Talk to our team

Share your model code, application and operating requirements. Contact our Australia and New Zealand team for selection support.
