L510s

Compact V/F & SLV Control Drive

Combining advanced control features, enhancing safety measures, and tailoring functionality to provide customers with a reliable, versatile, and user-friendly solution for their motor control needs.

APPLICATIONS

- HVAC Fans and Pumps
- Building Automation
- Machine Tools
- Packaging

FEATURES

- V/F Control and torque compensation function
- Built in MODBUS RS485 communication
- RJ45 Interface for PC and Copy Module
- PID Functionality
- Full Protective Functions
- Built In EMI Filter for Interference Suppression
- External Cooling Heatsink
- Built In Digital Display and Keypad including Speed Adjust Potentiometer
- 0.75-2.2kW 1-Ph Input and 3-Ph Output.

BENEFITS

- Providing with flexible control options to suit various motor applications and performance requirements
- Ensuring smooth motor starting even under heavy loads, improving overall system performance and reliability
- Ensuring quick response and enhanced safety or critical situations
- Providing reliable protection against dust and solid objects. The robust enclosure design ensures durability and long-term performance in various industrial environments
- Offering easy integration into industrial networks, allowing seamless connectivity and remote monitoring.
